<b>Date</b>	<b>Activity</b>	<b>Comment</b>
Feb 10th	Worked with Ridwan in creating the Use Case Description for Read Instructions	Ridwan did most of it, and I touched up a few things. The rest of the team also helped refine it a bit the day before we uploaded it when trying to make sure everything was just right
Feb 25th	Assisted Usama in creating the initial display of the board.	I made the initial code, and Usama fixed all the errors (both syntactically and logically) making it many times better.
Mar 4th	Coded the Saving functionality.	Received some assistance from Usama on how to output the saved information. We ultimately decided on a .txt file.
